Author: Swift Feet, Office 9

TITLE: Description of Mysterious Encounter in Industrial District of Arear

While bringing a prisoner in from the Industrial District to Tower 9 for questioning, Officer Jaguar 6 and I were ambushed by a mysterious person with an Azuba 3-13 (who will be referred to as M), who proceeded to stun us both for a short time and capture our unconscious prisoner. I opened fire on M, but two trained shots to the head and chest were dodged with ease on the part of M, the second shot being dodged resulting in a bullet through M's right mechanical hand. Jaguar 6 proceeded to grab the prisoner with an impromptu grappling hook, and I pursued M in order to engage CQC but was promptly knocked to the brink of death from two well-trained punches and a kick. Jaguar 6 tried to pull the prisoner from M's grasp, but the prisoner was dragged away along with the grappling hook. To quote Jaguar 6, "I asked for my grappling hook back, and what do ya know, it got thrown back. A voice called out, which I assume was our attacker, said *"You're welcome."*, sounded female". After this, Jaguar 6 healed me well enough to be able to walk back to Mortham Heights.

Further description of M:

M was seen wearing standard Office 9 robes as well as a white hood and mask. Other interesting details about M as well as the encounter include the following:

- Sole mechanical limb is M's right arm, determined by the strikes made against me.
- Inexplicably fast reflexes, to the point of dodging two rounds from a Ziporah from less than 50 feet away, as well as landing 3 solid strikes before I could raise my dagger.
- M did not seek to kill Jaguar 6 and I to detain the prisoner.
