

First Kill

Subject: Swift Feet, Asset 12g7

Location: —**REDACTED**—

Date: 9.21.668 SA

Author: Major Iragen, Office 9

Title: 12g7's first Live Target Exercise

Preface:

Initial Live Target Exercises are intended to be both a test of the physical skills each asset has learned over the first one and a half years of the Assassin Training Program as well as a placement test for each asset into different subsections of the Program.

Evaluation:

Asset 12g7 successfully passed the Live Target test. Details of which can be seen in Addendum 12g7-a.

It is recommended for Asset 12g7 to be placed in the High Sight subsection of the Assassin Training Program for the remainder of his training in order to hone long-ranged combat and tactical skills.

Addendum 12g7-a:

The following is a description of Asset 12g7's first Live Target Exercise:

Asset 12g7 requested an Azuba 12-12 with two chips in the magazine, 30 feet of rope, and a pocket knife for his test equipment. This request was granted.

As per test regulations, the target was released at 20:00 hours, and was given until 00:00 hours to prepare before 12g7's entrance into the Proving Ground. 12g7 successfully tracked the target, but stayed outside of a 100 foot radius.

At approximately 07:40 hours, 12g7 positioned himself on the east side of the target, and waited for the sun to rise. Shortly after sunrise, the target

woke up, and made his way north away from the clearing he slept in for the night.

12g7 initially followed parallel to the target, then slowly made his way toward and behind the target.

At approximately 08:19 hours, 12g7 shot the target in his right knee from 50 feet away, crippling the target. 12g7 then shot the target in his left shoulder as he attempted to get up.

Upon approaching the target, 12g7 stabbed the target in the base of the neck, killing him instantly.

12g7 then exhibited an unexpected behavior: 12g7 tied the rope around a high tree branch and the target's neck before cutting off the target's left ring finger.

Overall Time Elapsed: 8 hours, 27 minutes, 34 seconds.
